DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 are drawn to a trading system comprising a network, a clearinghouse device and a client device.
 - II. Claims 20-25 are drawn to client device comprising a processor, memory and a trading function.
 - III. Claims 26-38 are drawn to a method of changing transaction from a first market type to a second market type.
2. The inventions are distinct, each from the other because of the following reasons:

Invention I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case, invention II and III have separate utility from invention I such as a memory, and the steps of offering the transaction. See MPEP § 806.05(d).
3. Applicant is requested to elect one of the inventions I-III. Note that even though the inventions I-III are subcombinations and not species, the restriction is appropriate where the

subcombinations are linked. (MPEP 806.04(b)).

4. A telephone call was made to Mr. Louis DelJuidice on September 11, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
